

## The ISYS Difference

Businesses and government organizations are increasingly recognizing the time-saving, knowledge-sharing benefits that search software offers. For companies evaluating search technology, making sense of the landscape can be difficult. Vendors proffer an assortment of different proprietary features, not all of which will be relevant to your organization.

At the end of the day, if what you need is a solution to help you find information fast, then ISYS Search Software is the answer. ISYS removes all entry barriers by delivering a solution that can be deployed as a pilot in minutes and rolled out across an enterprise shortly thereafter.

Scalable from individual PCs and departmental networks to high-volume Websites and large corporate intranets, ISYS is the only solution to address the search needs of organizations of all shapes and sizes.

### Proven Results

Few vendors in this market can say they've worked with more than 10,000 organizations. ISYS can. Established in 1988, ISYS has benefited a wide range of global organizations operating in government, legal, law enforcement, recruitment, healthcare and financial services.

ISYS customers include the IRS, the Department of Homeland Security, Perkins Coie, Boeing, Lockheed Martin, Ernst & Young, Blue Cross Blue Shield and nearly half of the UK's police forces.

### A Better Value

Many search software vendors choose to charge customers on a per-document basis, while some even go so far as to 'lease' their technology. Such tactics prevent an organization from achieving benefits of scale and ensure a total cost of ownership that is anything but low. What's more, some of these search providers require significant consulting resources to get their 'solutions' working properly.

Not ISYS.

Priced for the real world, ISYS offers flexible technology that doesn't require an army of consultants to implement and maintain. And because ISYS prices its software according to the number of people who actually use it, you'll never have to worry about paying more as your document repositories grow.

Additionally, ISYS doesn't ask you to re-invest your initial purchase price every two years. When you buy an ISYS license, it's yours to keep for as long as you use the product. This approach ensures a faster, measurable return on your investment.

### Put ISYS to the Test

The ISYS line of search software is available for evaluation at no cost to you. Whether you're looking for a network-based departmental search solution or Internet-native search technology for your website or intranet, ISYS' information retrieval software can be installed, configured and deployed as a pilot within hours of receiving the software.

You can also be assured of one-on-one interaction with ISYS technology experts, who are dedicated to helping you conduct an accurate pilot that demonstrates precisely how the software works in practice -- no hooks, no gimmicks, no outside consulting required.

## The ISYS Range

The ISYS product suite offers comprehensive search solutions designed to meet the diverse information retrieval and knowledge management needs of organisations operating in a variety of industries.

### ISYS for workgroups

**ISYS:desktop** is the network-based application, scalable from a single PC through to mission-critical networks with thousands of users. ISYS:desktop can be used on its own to search the contents of individual PCs, LANs and WANs, or seamlessly integrated with all the ISYS products to create a complete knowledge management system.

### ISYS for web

**ISYS:web** gives you the power of the ISYS search engine in a web-based environment such as an intranet, portal or website. It can act as a standalone web server, offering all the necessary support for PHP scripting, SSI, CGI & ISAPI server extensions, log analysis and security. ISYS:web can also act as a comprehensive search tool, seamlessly integrating with other web servers.

The **ISYS:web.asp** search solution is designed specifically for integration into websites using Microsoft Internet Information Server (IIS). ISYS:web.asp is not a standalone product but a plug-in search module to the IIS environment. It offers more flexibility than the ISYS:web product when building your own portal environment.

### ISYS for developers

**ISYS:sdk** is the Software Developer's Kit, which allows you to incorporate the ISYS core search component into your custom application, portal or website. It provides the ISYS search engine in a Windows DLL or COM interface, complete with full documentation and sample programs in C, Visual Basic and Delphi.

### ISYS for email

**ISYS:email.search** quickly finds key words, names, phrases and dates in your Outlook and Outlook Express emails. Easy to use and install, ISYS:email.search is designed and priced for individual use.

### Modules and add-on software

**ISYS:spider** incorporates information from external websites, Lotus Domino and Unix files into your ISYS index.

**ISYS:rdu** replicates documents and ISYS indexes intact via a website or disk easily and securely.

**ISYS:publisher** publishes and distributes information to CD or network with full ISYS search functionality built-in.

**ISYS:intradisk** publishes HTML pages to CD complete with the powerful text retrieval capability of ISYS.

#### The ISYS difference:

1. Rapid deployment and piloting
2. Cost-effective - swift ROI
3. Sub-second results generation
4. Intelligent, accurate query analysis
5. Comprehensive file format support
6. Multi-language indexing
7. Superior handling of large files
8. Single-point access to disparate data
9. Intuitive and straightforward interface
10. Seamless security integration

#### ISYS is right for you if:

- You need to find information quickly and accurately
- You want a single point of access to multiple data types and sources
- You want a search solution in days or weeks, not months
